

A Data description

This appendix provides a detailed description of the dataset for the Euro Area and some of its countries. All series are retrieved from institutional sources. We provide a brief description for each series, indicate the source, the measurement unit and the seasonal adjustment, along with the transformation (if any) applied. Table 1 presents a glossary to properly understand the data description presented in Table 2.

Tables 2-12 include a numeric indicator for each series (N), an alphabetical identifier (ID), a short description of the series (Series), the unit of measure (ID), the seasonal adjustment (SA), the frequency (F), the source (Source) and the transformation applied both in the light and in the heavy transformation settings (LT and HT, respectively).

Table 13 summarizes the differences, in terms of series' frequency and availability, across datasets.

Ultimately, Table 14 summarized the differences, if any, on the treatment of the same series across datasets.

Table 1: Glossary

Source	Unit
EUR= Eurostat	CLV= Chain-linked volumes
OECD= Organization for Economic Co-operation and Development	CP_MEUR = Current Prices (Million€)
ECB = European Central Bank	1000-ppl= Thousands of persons
FRED = Federal Reserve Economic Data	1000-U = Thousands of Units

Seasonal Adjustment	Frequency	Transformation
NSA = No Seasonal Adjustment	Q = Quarterly	0 = No Transformation
SA = Seasonal Adjustment	M = Monthly	1 = $100 \times \log(x_t)$
SCA = Seasonal and Calendar Adjustment		2 = $100 \times \Delta \log(x_t)$
MSA = Manual adjustment		3 = $\Delta^2 \log(x_t)$
		4 = Δx_t
		5 = $\Delta^2 x_t$

In absence of available data on durable and non-durable goods for the Euro Area, we follow ? and build the aggregate series of durable consumption (CONSD) aggregating the data for the 20 individual Euro Area countries. Since data for services and non-durable goods are unavailable for many individual countries as well, we build an aggregate measure of non-durable goods (CONSND) which also includes semi-durable goods and services.
